Novi Sad

• EDUCATION

Faculty of Technical Sciences

/ Novi Sad / 2022 – Present

– Computer Engineering and Automation (E2)

Gymnasium Vrnjačka Banja

/ 2018 – 2022

– Natural Sciences and Mathematics

• TECHNICAL SKILLS

Frontend: React, Angular, JavaScript, HTML, CSS

Backend: Java (Spring Boot, Jersey/JAX-RS), C#, .NET, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, Neo4j

Mobile Development: Android, Firebase

Desktop Development: C#, WPF, XAML, MVVM

Tools & Technologies: Git, GitHub, Docker, Android Studio, Hibernate, Apache Kafka, RabbitMQ, gRPC, Spring Security, JWT, PKI, X.509

• PROGRAMMING LANGUAGES

• ABOUT ME

Final-year Computer Engineering student at the Faculty of Technical Sciences, currently completing my Bachelor's degree. Motivated to gain practical experience through responsible and dedicated work. I enjoy learning new technologies, improving my skills, and contributing to a collaborative team and a positive work environment. I am interested in opportunities where I can learn, grow, and meaningfully contribute.

• INTERNSHIP

SYNECHRON - WEB DEVELOPMENT INTERNSHIP

JANUARY - MARCH 2026

CAR INSURANCE PROJECT

- Worked on a microservices-based car insurance platform.

Technologies: Java Spring Boot, React, MySQL database, Hibernate, Spring Security, Apache Kafka

• PROJECTS

TOURIST TOUR MANAGEMENT PLATFORM

SERVICE-ORIENTED ARCHITECTURES, TEAM OF 4 / JUN 2026

- Developed a microservices-based tourist platform where users can create blogs, publish and purchase guided tours, follow other users, and interact through reviews and comments, using Dockerized services, API Gateway, SQL and NoSQL databases, and RPC-based communication.

Technologies: Java Spring Boot, React, PostgreSQL, MongoDB, Neo4j, Docker, gRPC, SAGA, API Gateway, Prometheus, Grafana

PUBLIC KEY INFRASTRUCTURE AND SECURE PASSWORD MANAGER

SECURITY IN ELECTRONIC BUSINESS SYSTEMS, TEAM OF 3 / JUN 2026

- Developed a secure PKI web application for digital certificate management, authentication and authorization, encrypted password management, and secure communication using modern security standards.

Technologies: Java, Spring Boot, React, PostgreSQL, Spring Security, PKI, X.509

SLAGALICA - MULTIPLAYER QUIZ GAME

MOBILE APPLICATIONS, TEAM OF 3 / JUN 2026

- Developed an Android multiplayer quiz application inspired by the Serbian TV game *Slagalice*, featuring multiple game modes, real-time gameplay, user authentication, leaderboards, achievements, and tournaments.

Technologies: Java, Android Studio, Firebase Authentication, Firebase Realtime Database

TOUR MANAGEMENT SYSTEM

SOFTWARE DESIGN, TEAM OF 15 / FEB 2026

- Developed a web application intended for tourists and tour creators, enabling tour search, browsing, and additional functionalities designed to enhance the tourist experience.

Technologies: C#, .NET, Angular,DDD, Modular Architecture

Java, C#, JavaScript, C, C++,
Python

• LANGUAGES

English
Serbian (Native)

• COURSES

AI Automation: Build LLM Apps
Udemy / Feb 2026

**Artificial Intelligence for
Beginners**
Alison / Aug 2024

Python Programming
SoftUni / Sep 2024

JUTJUBIĆ - VIDEO SHARING PLATFORM

INTERNET SOFTWARE ARCHITECTURES, TEAM OF 3 / FEB 2026

- Developed a web application inspired by YouTube, enabling users to upload videos, browse and watch content, and explore available video collections.

Technologies: Java Spring Boot, React, Docker, RabbitMQ, Transactions

AI IMAGE PROCESSING AND OBJECT RECOGNITION

SOFT COMPUTING, INDIVIDUAL PROJECT / JAN 2026

- Developed algorithms for computer vision tasks including object counting, image segmentation, and optical character recognition (OCR).
- Implemented data preprocessing and evaluation using the Mean Absolute Error (MAE) metric to measure prediction accuracy.

Technologies: Python, Computer Vision, Image Processing, OCR, Machine Learning

MARKETPLACE AND AUCTION PLATFORM (REACT & JERSEY)

WEB PROGRAMMING, TEAM OF 2 / SEP 2025

- The application includes three user roles - buyer, seller and admin - and functions as an online marketplace similar to KupujemProdajem.

Technologies: React, JavaScript, HTML, CSS, Java, Jersey (JAX-RS), REST API

ACCOMMODATION BOOKING SYSTEM - WPF DESKTOP APPLICATION

SOFTWARE SIMULATION AND MODELING / HUMAN-COMPUTER
INTERACTION, TEAM OF 4 / JUL 2025

- Developed a desktop application simulating interactions between four user roles: Owner, Guest, Guide, and Tourist.
- As the Guest role, implemented functionalities such as browsing available accommodations, booking reservations, canceling reservations, submitting reviews and ratings, and forum interactions.

Technologies: C#, .NET, WPF, XAML, MVVM architecture

• EXTRA-CURRICULAR ACTIVITIES

ORGANIZING TEAM

CODEREFERENCE – REGIONAL IT STUDENT CONFERENCE / ZLATIBOR / OCT
2024

- Assisted in coordinating panel discussions, communicating with participating companies, and supporting the overall organization of the conference.
